TRANSFORM YOUR WORKING DAY

CAMS Mobile allows you to access your CAMS in the field. With just a couple of taps of the screen, you can quickly and easily record details of all your works. Using GPS, Furniture and Issues can be plotted on the map. Using the in-built camera, photos can be taken of each item. The intuitive forms also allow you to record information about Jobs, Routes and Land.

A touch of a button synchronises the data on your device with your CAMS. So you are always working with a copy of your live data. You can synchronise your data anywhere there's a Wi-Fi or 3G connection, there's no need to bring the tablet into the office to get your data. And no need to worry about surveying in areas where there's no signal.

Complete Access Management Solution

Desktop

Comprehensive workflow management for path maintenance, asset management and definitive map production.

Library Link

Complete solution for managing your documents in CAMS. From images to correspondence to whole path files all at the click of a

Web

System Integration

Seamlessly sync with your other systems including call centre, finance, asset management systems and others.

ABOUT US

exeGesIS SDM is a small, dynamic company with over 20 years' experience in environmental management and rights of way surveying. We've surveyed over 45,000km of paths in the UK (the equivalent of walking around the world) and have fed this experience into the CAMS Mobile application to provide an app that's easy to use and does what you want.
